Chart 1. Percent of Financial Aid Awards in 2019-20 by Type and Ethnicity

Note: Multi-ethnic and American Indians not graphed.

De Anza College Financial Aid Highlights

Chart 1 compares financial aid awards in 2019-20 by each aid type across racial/ethnic groups to determine the rate at which each racial/ethnic group receives each type of aid.

The data points are displayed for:

- 1) the percent of the total student population who identify as such racial/ethnicity in 2019-20 (red bar)
- 2) the highest rate of financial aid awards for that particular racial/ethnic group and,
- 3) the lowest rate of financial aid awards for that particular racial/ethnic group.

The goal is to have the percent representation in the population for each racial/ethnic group match the percent of aid awarded to that group for each aid type.

For example, African Americans comprised 4% of the total student population in 2019-20, so, theoretically, they should comprise 4% of all types of awards. Anything above 4% is overrepresentation and anything below 5% is underrepresentation.
